PROFESSIONAL SUMMARY

Software Engineer – Automation with hands-on experience in enterprise software development, Salesforce dashboards and workflow automation, business-logic development, and software testing. Experienced in designing and executing test cases across functional, sanity, regression, API, and end-to-end testing, as well as performing infrastructure server sanity checks. Built and delivered internal production solutions, including a workforce Roster Management System and Queue Inflow Dashboard, used within GreyOrange. Technical foundation in JavaScript, React.js, Node.js, REST APIs, and MongoDB.

PROFESSIONAL EXPERIENCE

GreyOrange Pvt. Ltd. | Software Engineer – Automation | *July 2025 – Present*

- Develop and deliver internal software solutions and automation workflows to streamline enterprise operations and improve system efficiency.
- Build Salesforce dashboards, reports, flows, and automation to support operational visibility and business processes.
- Designed and developed the Queue Inflow Dashboard, implementing custom business logic to monitor team performance, queue inflow, and operational workload.
- Developed the Roster Management System (RMS), a real-time workforce availability application that replaced manual roster verification and reduced engineer identification time from approximately 5 minutes to under 1 minute.
- Independently designed application logic, documented test cases, and performed functional, sanity, regression, API, end-to-end, and automation testing using scripts/frameworks.
- Performed infrastructure server sanity checks to validate system health, service availability, and operational readiness.
- Translated operational and customer requirements into software logic and delivered solutions adopted for internal and customer-facing use.
- Worked across development, automation, testing, and delivery, building an end-to-end understanding of system dependencies and critical workflows.

Nations Sports and Education | Founder / Software Developer | *January 2021 – April 2025*

- Built a scalable MERN stack platform for 350+ users across 3 partnered schools.
- Developed secure role-based dashboards using JWT authentication, REST APIs, and MongoDB.
- Led Agile development and GitHub-based version control and deployment activities.

SELECTED PROJECTS

Roster Management System (RMS)

- Developed a React.js workforce scheduling platform to replace manual Excel-based roster verification.
- Built a real-time availability engine using browser time and day-specific shift schedules, including overnight shift handling.
- Reduced engineer identification time from approximately 5 minutes to under 1 minute.

Queue Inflow Dashboard

- Designed and built an operational dashboard to monitor queue inflow, team performance, and workload.
- Developed the underlying business logic and authored and executed test cases to validate functionality and data accuracy.
- Delivered the dashboard for use within GreyOrange.

AI Incident Tracking UI

- Developed a full-stack incident tracking platform using React.js, TypeScript, Node.js, and Java.
- Designed a modular, responsive Vite-based interface and integrated backend APIs for structured incident tracking and reporting.

TECHNICAL SKILLS

Programming: JavaScript, Java, C++, C, SQL
Development: React.js, Node.js, MERN Stack, REST APIs, HTML, CSS, Bootstrap
CRM & Automation: Salesforce Dashboards, Salesforce Flows, Workflow Automation, Business Logic Development
Testing & QA: Manual Test Case Design, Functional Testing, Sanity Testing, Regression Testing, API Testing, End-to-End Testing, Script/Framework-Based Automation Testing
Tools & Platforms: Postman, Jira, Git, GitHub, AWS, MongoDB, MySQL
Core Concepts: SDLC, STLC, Agile, Data Structures and Algorithms, Debugging

EDUCATION

Lovely Professional University, Punjab | 2022 – Present
B.Tech, Computer Science and Engineering | CGPA: 7.6
Govt. Model H.S. School | 2021 – 2022 | Class XII (Mathematics)
GCM Convent School | 2018 – 2019 | Class X (Mathematics)

CERTIFICATIONS

- Generative AI – Udemy
- Getting Started with AI and Machine Learning
- Object-Oriented Programming (C++) – CipherSchools
